

ISCD AND IOF FRAX INITIATIVE

Interpretation and Use of FRAX
in Clinical Practice

**ROMANIA – BUCHAREST
NOVEMBER 12–13th 2010**

**International
Osteoporosis
Foundation**

**THE INTERNATIONAL SOCIETY
FOR CLINICAL DENSITOMETRY**

We are pleased to invite you to attend a modified version of the ISCD Position Development Conference (PDC) that will be held with full scientific participation of the International Osteoporosis Foundation (IOF). The Conference will consist of scientific presentations, public discussion and debates leading to the development of an educational document to assist health-care providers in the clinical use of FRAX.

Three Task Forces (FRAX Clinical, FRAX BMD and FRAX International) have been formed to address specific questions regarding FRAX, conduct appropriate literature reviews and develop preliminary statements that will be presented to an expert panel and challenged at the conference.

The ISCD-IOF FRAX Initiative and ISCD 2010 FRAX PDC are clearly well-timed to address the many questions being raised by individuals from around the world seeking to integrate FRAX into their clinical practice.
